MEMO FOR THE RECORD

SUBJECT: Army Inspector General recommendation for more frequent updating of Sections 31, 32, 33

48

1. Mr. George W. Miller, non-attending but still designated Army member of the NIS Committee, today phoned the following:
2. The Army IG had inspected the Transportation Corps and noted that for basic intelligence they were relying on NIS Sections 31, 32, and 33 which in many cases were many years old and in some cases ten or more years. In consequence the Inspector General sent a memorandum to ACSI stating that these NIS units should be much more frequently updated.
3. Miller wondered if OBI could be of assistance in preparation of an ACSI memorandum which would answer the IG. I told him that, as he knew, this as a practical matter was much less a matter of scheduling desirabilities (at the NIS Committee level) than it was essentially a question of NIS production capabilities in this field as viewed by or in any event annually stated by the Production Center of DIA.
4. I told him OBI would be happy to print more 31's and 32's than we now are if DIA will produce them, and that the chairman of the NIS Committee had publicly expressed his concern with the cutback in these contributions.
5. I suggested that the Production Center was obviously the place for him to turn and that he phone Col. Early, but he indicated that he would first contact his old friend Nickolsburg.

NOTE: Not to be discussed outside OBI.
